**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-14, and 19-29, drawn to flame retardant formulations, classified in class 252, subclass 601+.

Group II: Claims 15, 17, 30 and 31, drawn to polymers having mixed therein specified flame retardant additive, classified in class 524, subclass various.

Group III: Claims 16, and 18, drawn to polymers with surface property of imbedded flame retardant additive, classified in class 428, subclass 500+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, and I and III, are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as buffering agents in water treatment and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the

Art Unit: 1714

evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have distinct properties which determine their usefulness, in particular the invention III cannot be use to derive smaller pieces of itself since such would deprive it of the surface treatment/value.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Donald E. Townsend, Jr., at 202-682-4727 on 22 April 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1714

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Suggestions for Improved Condition for Examination***

The claims have some idiomatic language which render them difficult to understand. In particular:

1. the phrase "...as being dispersed..." in claim 1 and others;
2. the term "natural numbers" means zero or positive integer;
3. the phrase "...non-metallic nature" in claims 3 and 13;
4. the phrase "...a crystal water" in claim 14.

It would simplify prosecution if these issues were disposed of before the first action on the merits.

***Contact Information***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew A. Thexton whose telephone number is 703-305-5085. The examiner can normally be reached on Monday-Friday, 8:30 to 6.
